

Kaspersky A/V Error

The designers of the New England Trail Website have gone through a long email exchange with Kaspersky's tech support and have been informed that it seems the URL has been marked as malicious in error. Kaspersky has not been able to explain what is causing this.

For now, here's what you can do on your end. **The site is safe.**

From Kaspersky Tech Support:

Open Kaspersky 2013.

Click on 'Settings'.

Click on the first icon, it looks like a shield.

Click on 'Web Anti-Virus' on the left.

Click on the 'Settings...' button on the right.

Click on the 'Trusted URLs' tab.

Check 'Do not scan HTTP traffic from trusted web addresses' if not already enabled.

Click on '+ Add'.

Enter the web address in the same format as the example: *.newenglandtrail.org/*

Click 'OK' 3 times.

Retry the web site. If it does not work, close all open web browsers and reopen the site.
